COUNCIL on LIBRARY and INFORMATION RESOURCES
Annual Report 2014–2015
The Council on Library and Information Resources (CLIR) is an independent, nonprofit organization that forges strategies to enhance research, teaching, and learning environments in collaboration with libraries, cultural institutions, and communities of higher learning. CLIR aspires to transform the information landscape to support the advancement of knowledge.

CLIR promotes forward-looking collaborative solutions that transcend disciplinary, institutional, professional, and geographic boundaries in support of the public good. In pursuing its mission, CLIR is committed to building trust, retaining independence, fostering collaboration, cultivating effective leadership, and capitalizing on strategic opportunities.
ACKNOWLEDGMENTS

The following institutions and individuals provide crucial support for the activities and programs of the Council on Library and Information Resources (as of June 30, 2015).

A

other productive, celebratory year for CLIR: the Council continues to flourish, expand its membership, and integrate with programs, projects, and issues of international reach.

Prominent new staff appointments this year include Bethany Nowviskie, who arrived in April as the director of the Digital Library Federation (DLF), and Nikki Ferraiolo, program officer for scholarly resources. Bethany brings a wealth of scholarship, teaching, and mentoring skills to DLF and CLIR. Her work at the Scholar’s Lab at the University of Virginia, her leadership in the international flourishing of digital humanities over the past decade and the increasing awareness of this field of research as integral to the evolution of the grand tradition of humanistic inquiry, and her foundational role promoting the concept and beneficial consequences of alternative careers in the academy will strengthen the mission of DLF and attract an ever-widening constituency.

Nikki brings program and research expertise from her work at Columbia, both as a masters’ student and as program manager in the history department. She joined CLIR just before the launch of the new digitizing hidden collections program and has brought great energy and intelligence to the effort in its first year. She was also a key organizing force behind the Hidden Collections Symposium—the capstone event for the seven-year cataloging program—in March 2015.

The appointment in June 2014 of Michael Edson, director of web and new media strategy at the Smithsonian Institution, as CLIR Distinguished Presidential Fellow also marks an important augmentation to CLIR’s mission. Michael is widely recognized as an articulate futurist who explores the potential of technology for museums and archives as a means to better understand our growing dependence on visual culture. Michael’s vision is ably expressed in a proposal he brought to CLIR this spring: Openlab, a project that will serve as instigator, incubator, and digital studio to accelerate the adoption of technologies and best practices across libraries, galleries, archives, and museums to catalyze sector-wide change.
This year also marked the publication of well-received research studies and reports. Two epitomize the range of CLIR’s purview. The *ARSC Guide to Audio Preservation* was commissioned in response to the severe risk of media deterioration and the limited funding to address this crisis. The guide is a practical introduction to caring for and preserving audio collections. It is aimed at individuals and institutions that have recorded sound collections but lack the expertise in one or more areas to preserve them. *The Changing Landscape of Library and Information Services: What Presidents, Provosts, and Finance Officers Need to Know* is a report that elaborates upon a productive meeting of CLIR’s CIOs in which key contemporary issues and challenges in library and technology services were enumerated.

CLIR received several important grants this year; of particular note was the generous support from The Andrew W. Mellon Foundation for the Digitization of Hidden Special Collections and Archives. This grant inaugurates the new iteration of the national competition begun with the Cataloging Hidden Special Collections and Archives program. Our digitization program aspires to encourage approaches to digitization that make possible new kinds of scholarship in the digital research environment; support the digitization of entire collections; promote strategic partnerships; promote best practices for ensuring the long-term availability and discoverability of digital content; and ensure that digitized content is made available to the public as easily and completely as possible. In addition to producing a wealth of digital objects of great cultural value, a salient goal is to facilitate the adoption of standards and best practices that will result in a coherent, sustainable academic digital library of unprecedented scope.

New to this year’s annual report is the category of Affiliates. We are using the term in a general way, to indicate a close programmatic alliance or association—a working relationship with many possible characteristics. The organizations listed bring to CLIR a variety of mutually beneficial opportunities. For example, NITLE is a program temporarily housed within CLIR as we work with its constituency to determine the services and resources that would help reinvigorate the institution; NITLE may remain a part of CLIR if its members so recommend. The International Interoperable Image Framework (IIIF) is an affiliate by virtue of our promotional support of the framework, our assistance with administering finances, and our mentoring of staff IIIF plans to hire in the coming years. These and other organizations that joined us subsequent to June 2015, including the National Digital Stewardship Alliance (NDSA) and the iSchool Consortium, offer a rich diversity of perspectives and interests while at the same time collectively strengthening our mission: collaborating with libraries, cultural institutions, and communities of higher learning to enhance research, teaching, and learning.
It is, as always, a privilege to work with the exceptionally talented staff at CLIR and our supportive Board of Directors. Many who are new to CLIR or know us by the volume of projects and research we produce believe the organization is three or four times its actual size; this is a tribute to the work capacity and dedication of our exemplary team.

Next year marks the 60th anniversary of CLIR: an opportunity to reflect upon decades of achievements and contributions to higher education and our role in promoting the public good of shared, open information. With the ongoing support of our sponsors and members, this landmark anniversary will be memorable as well as a pivot to further substantive work in realizing a vision as succinct as it is powerful: to transform the information landscape to support the advancement of knowledge.

Charles Henry

December 2015
CLIR’S REACH this year

416 people attended the 2014 DLF Forum

$4 million granted in the Hidden Collections program

Over 200 CLIR sponsors and DLF members

36 attended the 2015 Leading Change Institute in Washington, DC

15 Mellon Dissertation Fellowships awarded

42 Postdoctoral Fellows received grants

Four reports, numerous blog posts, and 6 newsletters published
Digital Infrastructure

Objective: Promote research, skill development, and collaboration to strengthen the digital infrastructure supporting all facets of the scholarly communication cycle.

Digital Library Federation Program

Strategy meets practice at the Digital Library Federation (DLF). Through its programs, working groups, and initiatives, DLF connects CLIR’s vision and research agenda to an active network of practitioners working in digital libraries, archives, labs, and museums. DLF is a place where ideas can be road-tested, and from which new strategic directions can emerge.

The Digital Library Federation is a robust and diverse community of practitioners who advance research, learning, and the public good through the creative design and wise application of digital library technologies. DLF serves as a resource and catalyst for collaboration among archives, libraries and library service organizations, publishers, labs, museums, professional organizations, vendors, and all who are invested in digital library issues. The organization promotes work on standards and best practices; research and data management across disciplines; aggregation and preservation services for digital collections; digital library assessment; and services that expand access to resources for research, teaching, and learning.

In April 2015, Bethany Nowviskie became director of the DLF, succeeding Rachel Frick, who left the organization in September 2014. Widely known
as a pioneer and leading force in the digital humanities, Nowviskie had been a distinguished presidential fellow at CLIR, president of the Association for Computers and the Humanities, and director of the internationally-known Scholars’ Lab at the University of Virginia Library. Among her goals for the coming year at DLF are increasing support for DLF’s working groups, improving communications and the organization’s web presence, deepening programmatic ties between DLF and CLIR, strengthening DLF’s connections with the national and international digital stewardship community, continuing to build a vibrant liberal arts colleges cohort within the DLF, and exploring intersections between digital library and museums practice.

**DLF Forum.** The DLF Forum is convened annually and is open to digital library practitioners from member institutions and the broader community. The Forum serves as a meeting place, marketplace, and congress. As a meeting place it provides an opportunity for DLF working groups, affiliated organizations, and community members to conduct business and present their work. As a marketplace of ideas, the Forum provides an opportunity to disseminate experiences and develop best practices, and to support a broader level of information sharing among digital library professionals. As a congress, the Forum provides an opportunity for the DLF to continually review and assess its programs with input from the community at large.

The 2014 DLF Forum, held October 27–29 in Atlanta, Georgia, drew a record 416 participants. Many of the sessions, including keynote addresses presented by Bethany Nowviskie and Bonnie Tijerina, were livestreamed and are available through the DLF website. In addition, a series of blog posts, contributed by recipients of DLF New Professionals Fellowships, DLF Forum Fellowships for Underrepresented Groups, and DLF Cross-Pollinator Awards, provide personal perspectives on the Forum. Affiliated events included the Ada Initiative’s Allies Workshop and the Taiga Forum.

Present at the 2014 Forum were representatives of several liberal arts colleges, and liberal arts college representation in the DLF community continues to grow. To better serve this community, in February 2015 DLF announced that it would host a Liberal Arts Colleges Preconference, preceding the 2015 Forum in Vancouver.

The 2014 Forum also welcomed four highly accomplished museum practitioners, thanks to generous support from the Samuel H. Kress Foundation for a new program for Museum Cross-Pollinator Fellows. Fellows each
shared reflections in a series of blog posts after the Forum, often highlighting the goals and challenges libraries and museums have in common.

**Digital Library Assessment.** A new and highly active DLF Digital Library Assessment group was formed in 2014. This group plans to meet in person during the DLF Forum to share problems, ideas, and solutions, and work year-round through a dedicated email list and a DLF-supported wiki. Membership is open to anyone interested in learning about or collaborating on the improvement of digital library assessment measures. Current subcommittees are focusing on tools and best-practices documents to support cost assessment, to measure digital library analytics, to standardize digital library content citations, and to assess user needs and usability. White papers and other work products will be made available throughout the year.

**DLF eResearch Network**

The DLF eResearch Network (eRN), created in 2014, is a cohort-based learning and networking experience meant to help academic and research libraries devise collaborative strategies for data management support. eResearch Network members develop plans appropriate for their institutions through collaboration, resource sharing, webinars, and custom consultations by eRN faculty. Network members come from colleges and universities of varying size. To date, 13 institutions from across the United States and Canada have participated in the eRN.

The 2014 eRN cohort concluded its work in November 2014. Over the course of the six month program, 24 participants from 8 institutions developed data management surveys, identified and filled needs for repository software, conducted outreach with local scholars and administrators, and piloted educational workshops. Participants consistently emphasize the value of peer-to-peer interaction in the eRN. “The DLF eRN faculty, fellows, and peers gave us valuable feedback on the current state of our research data services, and based on the eRN experience, we are moving forward with a data management needs assessment and a data repository pilot,” said Mayu Ishida, research services librarian at the University of Manitoba. Together with fellow 2014 eRN participant Kathleen Fear, data librarian at the University of Rochester, Ishida led a panel on “The Role of Assessment in Research Data Services” at the Research Data Access and Preservation (RDAP) summit in 2015.

The 2015 DLF eRN cohort kicked off with an in-person meeting in April,
co-located with the RDAP summit in Minneapolis. Work is expected to conclude with a meeting at the 2015 DLF Forum in Vancouver.

**Digitizing Special Formats Wiki.** The Digital Library Federation is now curating a list of resources for professionals planning projects involving the digitization of rare and unique materials. The list may be of special interest to CLIR Hidden Collections applicants and grantees, and includes introductory and reference materials that are good places to begin exploring issues relevant to digitizing cultural heritage.

**Study on Needs in Continuing Education for Managing Cultural Heritage Data**

In September 2013, the Institute of Museum and Library Services (IMLS) awarded CLIR a grant to examine federally mandated plans for open access and their implications for continuing education needs for libraries, museums, and other cultural heritage institutions. Under this grant, CLIR is conducting research in three areas. Part 1 is a highly structured content analysis of select federal agency plans for supporting open access to data and publications, identifying the commonalities and differences among the plans with emphasis on access to data. Part 2 takes the results of the content analysis and traces its implications for IMLS program areas and the cultural heritage institutions they serve. Part 3 identifies gaps in continuing education opportunities for cultural heritage professionals, assessing the readiness of the current professional workforce and identifying how best to address the needs and close the gaps in the immediate and longer term. Final results will be released in spring 2016.

**Committee on Coherence at Scale**

CLIR established the Committee on Coherence at Scale for Higher Education in October 2012, in partnership with Vanderbilt University. The committee’s charge is to examine emerging national-scale digital projects and their potential to help transform higher education in terms of scholarly productivity, teaching, cost-efficiency, and sustainability. The Committee currently comprises 24 members, representing university and college presidents and provosts, heads of national education associations and other organizations, and library and i-school deans. The Committee meets twice yearly.

In spring 2015, the University of Pittsburgh’s iSchool announced the first two iFellows under the new doctoral fellowship program for information science students that support research for the Committee on Coherence at Scale. Timothy Schultz, PhD student at Drexel University’s iSchool, and Wei Jeng, PhD student at the University of Pittsburgh’s iSchool, were selected from a competitive pool of applicants. Timothy Schultz’s research will dive into the world of “big data” as it pertains to collaborating, visualizing, and sharing information in the medical industry. Wei Jeng’s research
will focus on her interest in information sharing, with an emphasis on investigating how scholars communicate and share research data with one another. The program, funded by an award from The Andrew W. Mellon Foundation, will ultimately support 10 iFellows in total.

**SCHOLARSHIP and RESEARCH**

*Objective:* Explore and assess new research methodologies, emerging fields of inquiry, intellectual strategies involving data gathering and collaboration, and modes of communication, including sharing of research data and publishing models, that are likely to define the next generation of scholars.

**Postdoctoral Fellowship Program**

CLIR’s Postdoctoral Fellowship Program offers recent PhD graduates an opportunity to work on projects that forge and strengthen connections among library collections, educational technologies, and current research. Launched in 2004, the program has supported 130 fellows at 60 host institutions across the United States and Canada.

Since 2012, in response to a growing recognition within the professional community that research data management posed particular challenges to libraries and other departments serving today’s researchers, CLIR expanded the program’s focus to data curation. With grant support from the Alfred P. Sloan and Andrew W. Mellon Foundations, CLIR seeks to help host institutions establish staffing models, policies, resources, and services related to research data curation through matching those institutions with PhDs with expertise relevant to their needs.

In May 2015, CLIR announced the award of 14 postdoctoral fellowships: five Postdoctoral Fellowships in Academic Libraries, five CLIR/DLF Postdoctoral Fellowships in Data Curation for Visual Studies, and four CLIR/DLF Postdoctoral Fellowships in Data Curation for the Sciences and Social Sciences.

The Fellowships in Data Curation for Visual Studies were launched this year with funding from The Andrew W. Mellon Foundation. As a field, Visual Studies calls attention to the material, cultural, and historical contexts of all images, the relationship of the visual object to the viewer, and the act of seeing from a historical and cultural perspective. Scholars in this field analyze and interpret static images, as well as film and video resources, including oral histories, performance, art, and mass media. Through this program, CLIR/DLF seeks to raise awareness and build capacity for sound data management practice throughout the academy.
In June 2015, CLIR received a grant from The Andrew W. Mellon Foundation to fund a second cohort of data curation fellowships in Medieval Studies.

All new fellows attended a summer seminar, hosted at Bryn Mawr College, addressing issues faced by twenty-first-century libraries, including data curation and management, and provided an opportunity for fellows to participate in cohort-building activities. Fellows’ supervisors joined the seminar for one day to discuss expectations and establish effective communication strategies.

**Cataloging Hidden Special Collections and Archives**

Launched in 2008 with the support of The Andrew W. Mellon Foundation, CLIR’s Cataloging Hidden Special Collections and Archives Program announced its final round of 19 grants in December 2014. The program, which had supported efforts to expose unknown or underused cultural materials, has been succeeded by a new program to digitize hidden collections, described in the following section.

A capstone event for the Cataloging Hidden Special Collections and Archives program was held in March 2015 at the Kislak Center for Special Collections, Rare Books and Manuscripts at the University of Pennsylvania Libraries. The symposium, titled “Innovation, Collaboration, and Models” was preceded by an unconference. The two-day event drew 172 participants, including representatives from 62 Hidden Collections projects. More than 75 presenters and discussion leaders contributed...
to the program, vividly illustrating the impact the Hidden Collections initiative has had over its seven-year history. Grant recipients addressed problems that today’s library and cultural heritage professionals face as they organize collections and make them accessible to scholars and other users. Symposium proceedings are available at http://www.clir.org/pubs/reports/pub169.

Since the program’s inception, the program has awarded 129 grants amounting to $27.5 million. Grants have gone to academic libraries, museums, public libraries, archives, and historical societies, among other types of cultural institutions. Through the grant program, one quarter of the funded projects were collaborative partnerships.

By June 2015, grant recipients reported the archival processing of at least 2,952 collections, extending a reported 53,608 linear feet, an additional
4,229 cubic feet, plus 960 boxes of mixed materials. Recipients have created item-level descriptions for a reported 273,728 items, including:

- 50,551 books and manuscripts;
- 46,702 audio and audiovisual recordings;
- 29,393 items of ephemera;
- 27,125 pamphlets;
- 15,600 pamphlet plays;
- 8,560 maps and map series;
- 6,956 artifacts;
- 5,537 artworks;
- 2,978 architectural drawings; and more.

**Digitizing Hidden Special Collections and Archives**

In January 2015, CLIR announced a major new program to fund the digitization of rare and unique content in cultural memory institutions, thanks to a grant from The Andrew W. Mellon Foundation. The national competition is built upon the model of CLIR’s Cataloging Hidden Special Collections and Archives program. Developed through consultation with digital library practitioners and funders, and with input from the broader community, the program is designed to:

- encourage approaches to digitization that make possible new kinds of scholarship in the digital research environment
- support the digitization of entire collections, rather than selected items
- promote strategic partnerships, since few institutions have the capacity to handle and scan the wide array of objects in their collections
- promote best practices for ensuring the long-term availability and discoverability of digital files, and
- ensure that digitized content is made available to the public as easily and completely as possible.

Applicants submitted initial proposals by April 30, 2015; final proposals from those recommended for advancement by the program’s review panel were due July 27, 2015. Decisions will be announced by January 2016, and CLIR expects to award about $4 million.

**Mellon Dissertation Fellowships**

In 2015, 15 graduate students were selected to receive Mellon Dissertation Fellowships. The fellowship program, initiated in 2002, is intended to help graduate students in the humanities and related social science fields pursue doctoral research using original sources and gain skill and creativity in using original source materials in libraries, archives, museums, and related repositories. To date, the program has supported 194 graduate students who have carried out their dissertation research in public and private libraries and archives worldwide.
Plans are under way for an assessment of the program’s reach and impact. A draft assessment, prepared by Lori Jahnke, anthropology librarian at Emory University, and Amanda Watson, comparative literature librarian at New York University, is scheduled for review late in 2015, and a formal report is anticipated in March 2016.

**LEADERSHIP EDUCATION and CULTIVATION**

**Objective:** Investigate and seek to define the skills and expertise needed to administer, inspire, and inform the next generation.

**Leading Change Institute**

CLIR and EDUCAUSE hosted the second Leading Change Institute (LCI) May 31–June 5, 2015. Thirty-six participants joined deans Elliott Shore, executive director, Association of Research Libraries; and Joanne Kossuth, vice president for operations and CIO, Olin College of Engineering. Following the LCI, participants were invited to join deans Shore and Kossuth for regular hour-long discussions, allowing them to continue exchanges beyond the Institute and to provide ongoing support and advice for one another.

LCI aims to prepare and develop the next generation of leaders in libraries, information services, and higher education by engaging those who seek to further develop their skills for the benefit of higher education.

**Chief Information Officers Group**

CLIR’s Chief Information Officers Group is composed of 30 directors of organizations that have merged their library and technology units on liberal arts college and university campuses.

The group, which meets semi-annually, discussed the future of library and information technology services (LITS), and how their organizations should position themselves for that future at its December 2013 meeting. The discussion formed the basis for a white paper, written by CIOs Richard Holmgren of Allegheny College and Gene Spencer of Ursinus College,
that CLIR issued in September 2014. *The Changing Landscape of Library and Information Services: What Presidents, Provosts, and Finance Officers Need to Know* explores emerging opportunities for colleges and universities, the potential role of LITS organizations in realizing that potential, and the core competencies that LITS organizations will need to support positive institutional change in the decade ahead.

**Rovelstad Scholarship in International Librarianship**

Kelly Grogg, a library and information sciences student at the University of Iowa, was selected to receive the 2015 Rovelstad Scholarship in International Librarianship.

Grogg spent two years teaching at a rural high school in Cambodia through the United States Peace Corps. On her own initiative, she arranged for a large donation of books to the school’s library with the promise of a trained librarian and open access for the students. “I was able to witness how a rural village was transformed by the access to information they were granted through this small library. It was this experience that ignited an inescapable desire to pursue a career in developing information access throughout the world.”

Grogg has a B.A. in English Literature from the University of Iowa and works as a graduate research assistant in Special Collections and University Archives.
The Rovelstad Scholarship provides travel funds for a student of library and information science to attend the annual meeting of the World Library and Information Congress, which took place in Cape Town, South Africa, in August 2015.

AFFILIATES

National Institute for Technology in Liberal Education (NITLE)

In April 2015, it was announced that the National Institute for Technology in Liberal Education (NITLE) would migrate to CLIR from its home at Southwestern University on July 1, 2015, and that CLIR would oversee a rigorous analysis and assessment of the organization. The assessment, based on surveys and interviews, will identify the opportunities and challenges facing NITLE and is expected to be completed in February 2016.

INDEPENDENT AUDITOR’S REPORT

To the Board of Directors
Council on Library and Information Resources
Washington, DC

We have audited the accompanying financial statements of the Council on Library and Information Resources (a non-profit organization), which comprise the statement of financial position as of June 30, 2015, and the related statements of activities and change in net assets, and cash flows for the year then ended, and the related notes to the financial statements.

Management’s Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor’s Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.
Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Council on Library and Information Resources as of June 30, 2015, and the change in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matter

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The schedule of functional expenses on page 37 is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

COUNCIL ON LIBRARY AND INFORMATION RESOURCES

STATEMENT OF CASH FLOWS

For the year ended June 30, 2015

Operating Activities

Change in net assets $ 542,647

Adjustments to reconcile change in net assets to net cash provided by (used) operating activities:

Depreciation 16,431
Unrealized (gain) loss on investments 14,487
(Increase) decrease in other assets (27,966)
(Increase) decrease in accounts receivable (788,678)
Increase (decrease) in accounts payable and accrued expenses (62,065)

Net Cash Provided (used) by Operating Activities $ (305,144)

Investing Activities

Purchases of investments $ (2,528,000)
Sales of investments 2,773,248
Disposal of furniture and equipment 853
Purchases of furniture and equipment (42,065)

Net Cash Provided (Used) by Investing Activities $ 204,036

Financing Activities

Principal payments on capital lease $ (3,092)

Net Cash Provided (Used) by Financing Activities $ (3,092)

Net Change in Cash and Cash equivalents $ (104,200)

Cash and Cash Equivalents, Beginning of Year 8,322,215

Cash and Cash Equivalents, End of Year $ 8,218,015

Supplemental Cash Flow Information:

Interest paid during the year $ 1,168

The accompanying notes to financial statements are an integral part of this statement.
COUNCIL ON LIBRARY AND INFORMATION RESOURCES

NOTES TO FINANCIAL STATEMENTS

June 30, 2015

NOTE 1- Organization
The Council on Library and Information Resources is a not-for-profit organization incorporated under the laws of the District of Columbia in 1988 for the purpose of fostering, developing, and supporting systematic and purposeful collaboration in order to ensure the preservation of the published and documentary record in all formats and provide equitable access to that information.

The Council on Library and Information Resources operations are financed through contributions from colleges, universities and other organizations and through general support grants and restricted grants from private foundations and other sources. The Council on Library and Information Resources conducts its work directly through committees and working groups as well as through contracts with other organizations and individuals.

NOTE 2- Summary of Significant Accounting Policies

**Basis of accounting** - The accompanying financial statements of the Council on Library and Information Resources have been prepared on the accrual basis.

**Grant revenue and recognition of grantor restrictions** - The Council on Library and Information Resources reports grants as temporarily restricted support if they are received with grantor stipulations that limit the use of the grants as to time or purpose. When either condition is satisfied, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the statement of activities and changes in net assets as net assets released from restrictions. Support that is restricted by the grantor is reported as an increase in unrestricted net assets if the restriction expires in the reporting period in which the support is recognized.

**Contracts / Grants payable** - Contracts made by the Council on Library and Information Resources are recorded as contracts payable and expensed at the time contracts are awarded. Current period expenses are adjusted for contract refunds or over appropriations when received.

**Board designated net assets** - From time to time, the Board of Directors designates a portion of unrestricted net assets for various short-term projects.

**Cash and cash equivalents** - For purposes of the statement of cash flows, cash and cash equivalents consist primarily of deposits in a money market account and investments with original maturities of 90 days or less.

**Advertising costs** - Advertising costs are expensed as incurred.
NOTE 2-  Summary of Significant Accounting Policies (continued)

Accounts Receivable - Accounts receivable represent grant receivable, and current unreimbursed expenses on various contracts. Allowance for doubtful accounts is normally recorded for amounts deemed as uncollectible. The Council on Library and Information Resources management has evaluated accounts receivable collection from prior years and has determined that an allowance for doubtful accounts is not necessary.

Functional allocation of expenses - Costs of the various programs have been summarized on a functional basis in the accompanying financial statements. Salaries and travel costs have been allocated directly to programs and administration on a time-allocated basis.

Furniture and Equipment - Furniture and equipment are recorded at cost, less accumulated depreciation. Depreciation expense is computed using the straight-line method over the estimated useful lives of the respective assets. Expenditures for maintenance and repairs are charged against income as incurred; betterments which increase the value or materially extend the life of the related assets are capitalized.

Contributions - The Council on Library and Information Resources records grant income as unrestricted, temporarily restricted, or permanently restricted support, depending upon the terms and conditions of the grant.

Fair value of financial instruments – Management estimates that the fair value of all financial instruments at June 30, 2015 does not differ materially from the aggregate carrying values reported in the accompanying statement of financial position due to the short term maturities of those instruments.

Use of estimates - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Subsequent Events - In preparing these financial statements, The Council on Library and Information Resources has evaluated events and transactions for potential recognition or disclosure through October 22, 2015, the date the financial statements were issued.

NOTE 3-  Furniture and Equipment

Furniture and equipment consist of the following:

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Furniture and equipment</td>
<td>$126,283</td>
</tr>
<tr>
<td>Less: Accumulated depreciation and amortization</td>
<td>$(70,623)</td>
</tr>
<tr>
<td></td>
<td>$55,659</td>
</tr>
</tbody>
</table>
NOTE 4 - Investments

The Council on Library and Information Resources has adopted SFAS No. 124, “Accounting for Certain Investments Held by Not-for-Profit Organizations.” Under SFAS No. 124, investments in marketable securities with readily determinable fair values and all investments in debt securities are reported at their fair values in the statement of financial position. Unrealized gains and losses are included in the change in net assets. Investment income and gains restricted by a donor are reported as increases in unrestricted net assets if the restrictions are met (either by passage of time or by use) in the reporting period in which the income and gains are recognized.

Investment return consists of the following at June 30, 2015

<table>

NOTE 5 - Income Taxes

The Council on Library and Information Resources is exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code and applicable regulations of the District of Columbia.
COUNCIL ON LIBRARY AND INFORMATION RESOURCES

NOTES TO FINANCIAL STATEMENTS

June 30, 2015
(Continued)

NOTE 5 - Income Taxes (Continued)

The Organization is subject to income taxes in U.S. federal jurisdictions and various state jurisdictions. Tax regulations within each jurisdiction are subject to the interpretation of the related tax laws and regulations and require significant judgment to apply. In accordance with authoritative guidance on accounting for uncertainty in income taxes issued by the Financial Accounting Standards Board (the FASB), the Organization recognizes tax liabilities for uncertain tax positions when it is more likely than not that a tax position will not be sustained upon examination and settlement with various taxing authorities. Liabilities for uncertain tax positions are measured based upon the largest amount of benefit that is greater than 50% likely of being realized upon settlement. The guidance on accounting for uncertainty in income taxes also addresses de-recognition, classification, interest and penalties on income taxes, and accounting in interim periods. Management has evaluated the Organization’s tax positions and has concluded that the Organization has no uncertain tax positions that require adjustment to the financial statements to comply with the provisions of this guidance. Income taxes are accounted for under the asset and liability method. Management believes it is no longer subject to income tax examinations for years prior to June 30, 2012.

NOTE 6 - Net Assets released from Restrictions

Net assets were released from grantor restrictions by incurring expenses satisfying the restricted purposes or by occurrence of other events specified by grantors.

NOTE 7 - Retirement Plan

Employees are eligible for participation in the Council on Library and Information Resources defined contribution retirement annuity program ("the Plan") administered through the TIAA/CREF insurance companies. Individual contracts issued under the Plan provide for full and immediate vesting of the Council on Library and Information Resources contributions. The Council on Library and Information Resources contributes 15% of employees’ salaries to the Plan each year. The Council on Library and Information Resources contributions were $159,078 in 2015.

NOTE 8 - Concentrations of Credit Risk

Financial instruments which potentially subject the Council on Library and Information Resources to concentrations of credit risk consist primarily of cash equivalents. Bank deposit accounts are insured by the Federal Deposit Insurance Corporation ("FDIC") up to a limit of $250,000. At times during the year, the Organization maintains cash balances in excess of the FDIC insurance limits. Management believes the risk in these situations to be minimal.

The Council on Library and Information Resources received $6,873,431 from one organization which represents 73%, of total revenue.

COUNCIL ON LIBRARY AND INFORMATION RESOURCES

NOTES TO FINANCIAL STATEMENTS

June 30, 2015
(Concluded)

NOTE 11 - Fair Value of Financial Instruments

The carrying amounts reflected in the balance sheets for cash, cash equivalents, loans and notes payable approximate the respective fair values due to the short maturities of those instruments. SFAS 157 requires a fair value hierarchy to be used to prioritize valuation inputs into three levels:

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 – Observable inputs other than the quoted prices included in Level 1. Level 3 – Unobservable inputs.

Fair values of assets and liabilities measured on a nonrecurring basis at June 30, 2015 are as follows:

<table>
<thead>
<tr>
<th>Description</th>
<th>Fair Value</th>
<th>(Level 1)</th>
<th>(Level 2)</th>
<th>(Level 3)</th>
<th>(Losses)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Long-lived assets held for sale</td>
<td>$2,024,313</td>
<td>$2,024,313</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Long-lived assets have been valued using a market approach. The values were determined using market prices of similar long-lived assets.

NOTE 12 – Other Income

Other income consists of the following:

- Webinar and other fees $14,163
- Total Other Income $14,163
The accompanying notes to financial statements are an integral part of this statement.
